Questions? Contact Renee Calkins renee.calkins@affiliate.msu.edu

Objectives:

1. Describe complexities of treating acute and chronic pain in patients with substance use disorder.
2. List various approaches to treating acute or chronic pain in a patient with substance use disorder.
3. Describe office-based practices to support patients with substance use disorder who are being treated for pain.

Learning Outcome:

Upon completion of this activity, participants will report increased knowledge of what treatment options can be utilized for patients who have substance use disorder and are also being treated for pain.
